

Grease Master Marine Grease

# Section 1. Identification

| GHS product identifier        | : Grease Master Marine Grease  |
|-------------------------------|--|
| Synonyms                      | : Lubricating grease;<br>CITGO <sup>®</sup> Material Code: 665523341   |
| Code                          | : 665523341  |
| MSDS #                        | : 665523341  |
| Supplier's details            | : Master Chemical<br>4635 Willow Drive<br>Medina, MN 55340<br>T 612-478-2360   |
| Emergency telephone<br>number | : Technical Contact: (800) 248-4684<br>Medical Emergency: (832) 486-4700<br>CHEMTREC Emergency: (800) 424-9300<br>(United States Only) |

# Section 2. Hazards identification

| OSHA/HCS status                            | : While this material is not considered hazardous by the OSHA Hazard Communication<br>Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the<br>safe handling and proper use of the product. This SDS should be retained and available<br>for employees and other users of this product.   |
|--|---|
| Classification of the substance or mixture | : Not classified.   |
| GHS label elements                         |   |
| Signal word                                | : Warning   |
| Hazard statements                          | <ul> <li>Injection under the skin can cause severe injury.</li> <li>Most damage occurs in the first few hours.</li> <li>Initial symptoms may be minimal.</li> </ul>   |
| Precautionary statements                   |   |
| General                                    | : Avoid contact with eyes, skin and clothing. May be harmful if swallowed. IF IN EYES:<br>Rinse cautiously with water for several minutes. IF SWALLOWED: Do NOT induce<br>vomiting. After handling, always wash hands thoroughly with soap and water. If you feel<br>unwell, seek medical attention and show the label when possible. Keep out of reach of<br>children. |
| Prevention                                 | : Not applicable.   |
| Response                                   | : Not applicable.   |
| Storage                                    | <ul> <li>Store in a dry place and/or in closed container. Store in accordance with all local,<br/>regional, national and international regulations.</li> </ul>  |
| Disposal                                   | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazards not otherwise<br>classified        | : Injection of petroleum hydrocarbons requires immediate medical attention  |
|  |   |

# Section 3. Composition/information on ingredients

| Substance/mixture                | 4 | Mixture  |
|----------------------------------|---|--|
| Other means of<br>identification | : | Lubricating grease;<br>CITGO <sup>®</sup> Material Code: 665523341 |

| CAS number/other identifie     | <u>rs</u>                            |                           |             |     |
|--------------------------------|--------------------------------------|---------------------------|-------------|-----|
| CAS number                     | : Not applicable.                    |                           |             |     |
| Date of issue/Date of revision | : 11/11/2014. Date of previous issue | : No previous validation. | Version : 1 | 1/9 |

# Section 3. Composition/information on ingredients

| Ingredient name | %     | CAS number  |
|-----------------|-------|-------------|
| Polymers        | 1 - 5 | Proprietary |

\* = Various \*\* = Mixture \*\*\* = Proprietary

Any concentration shown as a range is to protect confidentiality or is due to process variation.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

| Description of necess | ary first aid measures   |
|-----------------------|--|
| Eye contact           | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>                  |
| Inhalation            | : Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if symptoms occur.  |
| Skin contact          | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>   |
| Ingestion             | : Wash out mouth with water. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur. |

### Most important symptoms/effects, acute

| Potential acute health effects |   |
|--------------------------------|---|
| Eye contact                    | No known significant effects or critical hazards.   |
| Inhalation                     | No known significant effects or critical hazards.   |
| Skin contact                   | Injection of pressurized hydrocarbons can cause severe permanent tissue damage.<br>Initial symptoms may be minor. |
| Ingestion                      | No known significant effects or critical hazards.   |
| Over-exposure signs/sympto     | <u>ns</u>   |
| Eye contact                    | No specific data.   |
| Inhalation                     | No specific data.   |
| Skin contact                   | No specific data.   |
| Ingestion                      | No specific data.   |

### Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|----------------------------|---|
| Specific treatments        | : Treat symptomatically and supportively.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.  |

### See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Specific hazards arising from the chemical | : No specific fire or explosion hazard.                         |
|--|---|
| Extinguishing media                        |   |
| Suitable extinguishing media               | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media             | : None known.   |
|  |   |

Date of issue/Date of revision

: 11/11/2014. Date of previous issue

# Section 5. Fire-fighting measures

| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>sulfur oxides<br>metal oxide/oxides   |
|--|---|
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

| Personal precautions, protec   | tiv | e equipment and emergency procedures   |
|--------------------------------|-----|--|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Put on appropriate personal<br>protective equipment. |
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information<br>in Section 8 on suitable and unsuitable materials. See also the information in "For non-<br>emergency personnel".   |
| Environmental precautions      | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | ont | ainment and cleaning up  |
| Small spill                    | :   | Move containers from spill area. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                    | :   | Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see                             |

Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

| Precautions for safe handling                                      |   |  |
|--|---|--|
| Protective measures  | Put on appropriate personal protective equipment (see Section 8).   |  |
| Advice on general occupational hygiene                             | Eating, drinking and smoking should be prohibited in areas where this mate<br>handled, stored and processed. Workers should wash hands and face bef<br>drinking and smoking. Remove contaminated clothing and protective equip<br>entering eating areas. See also Section 8 for additional information on hyg<br>measures.  | ore eating,<br>oment before  |
| Conditions for safe storage,<br>including any<br>incompatibilities | Store in accordance with local regulations. Store in original container prote<br>direct sunlight in a dry, cool and well-ventilated area, away from incompatib<br>see Section 10) and food and drink. Keep container tightly closed and sea<br>eady for use. Containers that have been opened must be carefully resealed<br>upright to prevent leakage. Do not store in unlabeled containers. Use appre-<br>containment to avoid environmental contamination.<br>Bulk Storage Conditions: Do not apply heat or flame to stockpiled materia<br>stock to reduce the potential for hot spots. Do not store with oxidizers. Mir<br>creation by keeping material moist and/or covered. | ale materials<br>aled until<br>ed and kept<br>ropriate<br>al. Rotate |

# Section 8. Exposure controls/personal protection

### **Control parameters**

### **Occupational exposure limits**

None identified.

| Appropriate engineering controls | -   | Good general ventilation should be sufficient to control worker exposure to airborne contaminants.   |
|----------------------------------|-----|--|
| Environmental exposure controls  | :   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, vapor controls, filters or engineering modifications to the process equipment will<br>be necessary to reduce emissions to acceptable levels.  |
| Individual protection measur     | res |  |
| Hygiene measures                 | :   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection              | :   | Safety glasses equipped with side shields are recommended as minimum protection in industrial settings. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: Safety glasses with side shields. Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If inhalation hazards exist, a full-face respirator may be required instead. |
| Skin protection                  |     |  |
| Hand protection                  | 1   | Chemical-resistant gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  |
| Body protection                  | :   | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection            | :   | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection           | :   | Use a properly fitted, particulate filter respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |
|                                  | _   |  |

# Section 9. Physical and chemical properties

| : Solid. [Smooth texture]  |  |  |  |
|--|--|--|--|
| Green.   |  |  |  |
| Mild petroleum odor  |  |  |  |
| : Not available.   |  |  |  |
| : Not available.   |  |  |  |
| : Open cup: >150°C (>302°F) [Estimated]  |  |  |  |
| : <1 (n-butyl acetate. = 1)  |  |  |  |
| : Lower: 1%<br>Upper: 7%   |  |  |  |
| : <0.0013 kPa (<0.01 mm Hg) [room temperature]                                 |  |  |  |
| : >1 [Air = 1]   |  |  |  |
| : 0.92   |  |  |  |
| : Estimated 7.67 lbs/gal   |  |  |  |
| : Estimated 22 @ 60 F  |  |  |  |
| : Insoluble in the following materials: cold water and hot water.              |  |  |  |
| : 11/11/2014. Date of previous issue : No previous validation. Version : 1 4/9 |  |  |  |
|  |  |  |  |

# Section 9. Physical and chemical properties

: 2

**NLGI Grade** 

# Section 10. Stability and reactivity

| Reactivity                         | : Not expected to be Explosive, Self-Reactive, Self-Heating, or an Organic Peroxide under US GHS Definition(s). |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                               |
| Conditions to avoid                | : No specific data.   |
| Incompatible materials             | : No specific data.   |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced.          |

# Section 13. Disposal considerations

# Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# Section 14. Transport information

|                               | DOT Classification | IMDG           | ΙΑΤΑ           |

# Section 15. Regulatory information

Classification : Not applicable.

| Name     | %  | Fire<br>hazard | Sudden<br>release of<br>pressure | Reactive | Immediate<br>(acute)<br>health<br>hazard | Delayed<br>(chronic)<br>health<br>hazard |
|----------|----|----------------|----------------------------------|----------|--|--|
| Polymers | <5 | No.            | No.                              | No.      | Yes.                                     | No.                                      |

### State regulations

| Massachusetts | : | None of the components are listed. |
|---------------|---|------------------------------------|
| New York      | 1 | None of the components are listed. |
| New Jersey    | ; | None of the components are listed. |

Pennsylvania : None of the components are listed.

### California Prop. 65

WARNING: This product contains less than 0.1% of a chemical known to the State of California to cause cancer.

| Ingredient name | %     | Cancer | Reproductive |  | Maximum<br>acceptable dosage<br>level |
|-----------------|-------|--------|--------------|--|---------------------------------------|
| ethylbenzene    | <0.01 | Yes.   | No.          | 41 µg/day (ingestion)<br>54 µg/day<br>(inhalation) | No.                                   |

### **International regulations**

| International lists | <ul> <li>Australia inventory (AICS): Not determined.</li> <li>China inventory (IECSC): All components are listed or exempted.</li> <li>Japan inventory: Not determined.</li> <li>Korea inventory: All components are listed or exempted.</li> <li>Malaysia Inventory (EHS Register): Not determined.</li> <li>New Zealand Inventory of Chemicals (NZIoC): All components are listed or exempted.</li> <li>Philippines inventory (PICCS): All components are listed or exempted.</li> <li>Taiwan inventory (CSNN): Not determined.</li> </ul> |
|---------------------|--|
| Canada inventory    | : All components are listed or exempted.   |
| EU Inventory        | <ul> <li>At least one component is not listed in EINECS but all such components are listed in<br/>ELINCS.</li> <li>Please contact your supplier for information on the inventory status of this material.</li> </ul>   |
| WHMIS (Canada)      | : Not controlled under WHMIS (Canada).   |

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.
